Subject: Upcoming Independent Science Panel on the Pebble Mine
Attachments: ATT40682.txt

Greetings! Several people who attended the Keystone Center's independent science panels last October in Anchorage suggested that we hold future science panels somewhere in the Bristol Bay region. We are now planning a 2-day science panel that is focused on wildlife, endangered species, vegetation, and wetlands chapters of the Pebble Limited Partnership's Environmental Baseline Document. We are considering holding the panel in April in Dillingham and have several questions that will help us accommodate participants who may attend the panel event or participate via online webstreaming. The brief survey at the link below will help us determine the best way to accommodate those who wish to participate.

Please take a moment to help us shape this Independent Science Panel to best fit your needs. The survey will close on February 11th.
